NEARING THE END.

The Senate Agrees to Vote on the Tariff Bill September 8.

This Gives Promise of an Adjournment the First Week in October-Race for Recognition.

The Republicans Have Resolved to Take up the Election Bill the First Thing in the Next Session-

Rengan got There.

Special to the Garette WASHINGTON, Aug. 26 .- There was an

interesting race in the senate to-day between Senators Reagan and Stewart, Irrigation was being and Mr. Allison was explaining the action of the committee. Both Reagan and Stewart were waiting for Allison to close. Each of these senators has a fixed opinion on Maj. Powell and the geological survey, and neither of them has been known to miss an opportunity to speak. Each loaded to the muzzle Was to with documents and arguments. Stewart arose several times during Allison's remarks, and Rengan was very anxious also that the lown senator should cease speaking. At last was evident Allison was about to conclude and Stew-art got up for the second time, motioning to the presiding offi-cer, Ingalis, that he wanted recognition. In this position he stood awaiting for the dying words of the senator from lows. Mr. Reagan had both hands on his chair, his head had ceased to move toward Ingalis, and he watched only Allison. By this time every one except the official stenographer were intent on the race; The last word came and then the Texan sprang from his chair and said: "Mr. President."

Mr. Ingalls said: "The senator from Texas. "

Mr. Stewart sat down. He evidently was tired, as he had been standing for some time. Reagan had outwitted him and the race for recognition was won. S. Webb of Albany, Tex., is at the Metropolitan.

Agreed at Last.

Special to the Gazette.

WASHINGTON, Aug. 26 .- The argument between the Democrats and Republicans to postpone the Federal election bill and dispose of the tariff bill promptly was perfected in the senate this morning. Plumb withdrew his objection to the proposition of Aldrich and the unanimous consent was secured. A vote on the tariff bill on the 8th of September gives promise of an adjournment the first week in October, and of course settles the election bill. Something may happen to prolong the session, but the election bill will not be benefited by that. At the next session, whether in December or two weeks earlier, the corpse will be brought into the senate again and an attem,t will then be made

into the appearance of life. The Republicans have agreed among themselves that they will take this bill up the first thing and consider it day after day to the exclusion of everything else. The whole time from the day of their reassembling until the 4th of March may be consumed without considering any other measures. It is asserted now that even the appropriation bills will not be allowed to interfere, and it may happen that on the 4th of March none of the appropriations for the succeeding fiscal year will be made. The conditions are such as to make it just possible that there may be two extra sessions within the year, one before and one after the regular short session. But those who are counting on devoting so much time to the election bills should remember that reapportionment comes in some time during this

The Remarkable Time of a Mile in Thirty-Three Seconds on a Bicycle Railroad.

A mile in thirty-three seconds is the rate of speed in which a party of newspaper men were carried on the Boynton bioycle railway on Friday from Gravesend to Borrow's hotel at Brighton. Coney Island, Eben Moody Boynton, president of the company which has built the road, was on hand to explain its operations, and Gen. George Wingste. attorney for the Brooklyn elevated rallway, watched the new style of passenger transportation with deep interest. A single bicycle passenger car was used, clothes pin, Ephriam M. Turner, Fort running upon one side of the old Brigh-Worth; design for lamp chimney top, ton Beach tram. The car was a doubledecker car, in each deck being six double and one single compartments, each compartment being by itself and entered from the side of the car. Each seat accommodating four persons. The car is less in width than half the standard-gauge tracks, so that two cars can pass each other when they run on opposite rails. The wheels of the car are directly under the center, a double flauge grasps the rall.

The car is prevented from toppling over by double wheels attached to the top of the car and running one on each side of a continuous wooden beam held up by the framework on either side of the track. The engine employed is a bleycle one also. The car is run on the principle of a hoop in motion, which the faster it goes is the less likely to wobble or turn over. Mr. Boynton says his scheme is practical for elevated roads, and some engineering papers have already declared that it is destined to revolutionize the present system of passenger transportation. Mr. Boynton says he can carry 1000 passengers at the rate of ninety miles an hour continuously, or 600 passengers at 100 miles an hour.

wanted to run the party. The lily whites were completely taken at a disadvantage, as the black ring captured the entire organization, electing Davis of Waller chairman and Cardwell of Grimes secretary. Both are colored. Wright Cuney, collector of customs of Galveston, the colored leader and most the stand, and never was such invectives burted as the excoriating he gave the Lily whites. The crops this year have been a erops this year have been a total failure owing to the drouth and all the settlers who cannot get funds from Eastern friends are pulling out for a more congenial country. There will be much suffering there this winter, as the \$45,000 donated by congress for the relief of the drouth-stricken section will not be a drop in the bucket.

There was left at THE GAZETTE office yesterday by Edgar Wolff a strange and unusual sample of cotton. It is a stalk with bolls well opened and showing s good quality of cotton, all the growth from an old root of last year's planting, the stalk from which had been cut down. The sample comes from H. S. Thompson's place on Bear creek. It seems as though Tarrant county soil will do almost anything.
